## SUMMARY

To secure a challenging position in the IT industry where I can apply my knowledge, continuously learn new technologies, and contribute to the growth of the organization.

## EDUCATION

### Bharathidasan University

Jun 2024 - Jun 2026

M.C.A (Distance Education)

Percentage (up to 2nd Semester): 80%

### Jamal Mohamed College (Autonomous), Bharathidasan University

Aug 2021 - Apr 2024

B.C.A

Percentage: 75%

## EXPERIENCE

### Vyoobam Tech

Aug 2025 – Present

MERN Stack Developer

- Developed and maintained MERN-based web applications, including creating new features, fixing bugs, and improving performance under senior developer guidance.
- Built responsive UI screens using React and Tailwind CSS, converting Figma designs into clean, mobile-first components and reusable layouts.
- Implemented backend APIs using Node.js, Express, and PostgreSQL, including CRUD operations, authentication modules, and optimized SQL queries.
- Integrated frontend with backend APIs, handled data fetching, validation, and error handling, ensuring smooth end-to-end functionality.
- Worked with team using Git & GitHub, participating in daily standup, completing assigned tasks, and following agile.
- Collaborated with senior developers and designers to create websites that are attractive, user-friendly, and functional.

## PROJECTS

### Logistics Company Website (Freelance) [Link](#)

- Built a responsive logistics company website for Deal Universal Services using React and Tailwind CSS.
- Developed reusable UI components and optimized page structure for fast performance.
- Optimized the website for smooth scrolling and interactive user experience.

### Blog Website [Link](#)

- Built a full-stack Blog Application using the MERN stack, allowing public users to browse blogs while restricting blog creation to authenticated users only.
- User login functionality with credentials stored in browser local storage (no sign-up).
- Designed responsive UI with conditional rendering, showing "Create Blog" and dashboard options only to authenticated users, while unauthenticated users can view blogs in read-only mode.

### Chat Application [Link](#)

- Developed a real-time chat application using MERN Stack and Socket.io, enabling instant messaging with live user presence and typing indicators.
- Implemented global state management with Zustand, optimizing message flow, online users list, and UI responsiveness with minimal re-renders and lightweight state architecture.
- Designed secure and scalable backend APIs with Node.js + Express, including JWT-based authentication.

## SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, Python, SQL, PostgreSQL
- **Frameworks and Libraries:** React.js, Node.js, Tailwind CSS
- **Tools:** Visual Studio Code, Postman
- **AI Tools:** Lovable AI, Replit, Cursor AI
